## Object And Array

---

1. Object Example: Write a JavaScript program to display the properties of a JavaScript object.

Sample.html

Sample Code :

```
let emp= {  
    id:101,  
    firstName:'santosh',  
    lastName:'turerao',  
    email:'tureraosatosh@gmail.com',  
    salary:10000  
}  
  
document.write("Employee ID : "+emp.id+"<br> "+" Employee Name  
:"+emp.firstName+"<br> "+"Last Name :"+emp.lastName+"<br> "+"  
Employee Salary:"+emp.salary);
```

Output:

Sample.html

---

Employee ID : 101  
Employee Name :santosh  
Last Name :turerao  
Employee Salary:10000

Array Of Object Example:

Display multiple Object Using Objects Array.

Sample1.js

```
let employees=[
  {
    firstName:'santosh',
    lastName:'turerao',
    email:'tureraosatosh@gmail.com',
    salary:10000
  },
  {
    firstName:'Sagar',
    lastName:'Kamble',
    email:'sagarkamble@gmail.com',
    salary:150000
  }
]
// Printing data using loop

for(let i=0;i<2;i++)
{
  document.write(employees[i].firstName," ",employees[i].lastName,"
",employees[i].email," ",employees[i].salary,"<br>")
}
```

**OUTUPUT**

```
santosh turerao tureraosatosh@gmail.com 10000
Sagar Kamble sagarkamble@gmail.com 150000
```

Q1. Print Fruits name

```
let fruits=["Apple","Mango","Banana"];
```

```
Apple  
Mango  
Banana
```

Q2. Get the user input like 1 to 5 and print according name of the day

```
let days=["Sun","Mon","Tue","Thu","Fri","SAT","SUN"]
```

input : 1

Output : Sunday
